Elwood Beach Limited presents **Algordanza**. A new philosophy of burial was first conceived in 2003 by Algordanza founders, Mr Rinaldo Willy and Veit Brimer in Chur, Switzerland. They had pioneered the process of transforming ashes into...diamond. After months of intense research and feasibility studies, the corporation "Algordanza Brimer and Willy" was founded on July 7, 2004. Since then, Algordanza has expanded its presence in 20 countries around the world. Today in 2009, Algordanza together with Elwood Beach Limited, has setup its Greater China region main office in Hong Kong. Together, it aims to bring to the Greater China region a very special and personified service of commemoration, a symbol of personal closeness, imperishability and love, in remembrance of a beloved person.

An Algordanza memorial diamond is the most personal, most unique and most beautiful way for the bereaved to remember a beloved one.
